

155Mbps 100BASE SFP MODULES

Overview

The 100Base SFP transceiver supports 20+km transmission distance with SMF and 2km with MMF.

The transceiver consists of : the transmitter section incorporates a 1310nm FP laser. The receiver section consists of a PIN photodiode integrated with a trans-impedance preamplifier (TIA). All modules satisfy class I laser safety requirements. The optical output can be disabled by a TTL logic high-level input of TX Disable. TX Fault indicates the degradation of the laser. Loss of signal (LOS) output indicates the loss of an input optical signal of receiver. It is used in Telecom and Fast Ethernet application, SONET OC-3/SDH STM-1.
